

Funding routes and complementary funding mechanisms

Applicants are encouraged to select the funding channel that best matches the nature and purpose of the proposed activity. The three funding mechanisms available in the context of the EURECA-PRO Energy in Transition Flagship have complementary purposes:

Eligible activity/cost	EURECA-PRO 35k Flagship Funding <i>Networking & educational activities</i>	UH Energy Flagship Funding <i>Collaborative research activities</i>	UH Outgoing Mobility Funding <i>Mobility UH → EURECA-PRO partners</i>
Scientific/ methodological workshops	✓	✓	—
Capacity building activities	✓	✓	—
Summer/winter schools	✓	—	—
Stakeholder networking	✓	✓	—
Outreach, knowledge transfer	✓	✓	—
Publication, dissemination & science communication	—	✓	—
Master student learning activities (PBL, challenges, innovation projects)	✓	—	—
Master thesis mobility	✓	—	—
Alliance-related mobility for capacity building	✓*	—	✓
Research consumables & materials	—	✓	—
Research infrastructure, facilities & datasets	—	✓	—

Specialised research services (e.g. statistical support, transcription, laboratory analyses)	—	✓	—
Main purpose	Networking, education & capacity building within EURECA-PRO	Collaborative research & research cooperation within the Energy in Transition Flagship	Supporting mobility between UHasselt and EURECA-PRO partner universities
Allocation principle	Flagship-level planning and allocation.	Competitive call, subject to available budget.	First come, first served; subject to available budget
Application principle	Activity-based allocation within the approved Flagship finance plan.	Application via the dedicated application form. Eligible activities should first be financed through EURECA-PRO Flagship Funding where applicable.	Application via this application form
Expenditure deadline	31 October 2027	15 July 2029	31 October 2027

* Alliance-related mobility funded through the EURECA-PRO Flagship Funding must be linked to learning outcomes and capacity-building purposes, and not to research execution.

The table is intended as a general overview of the different funding mechanisms. Eligibility of individual activities and costs remains subject to the specific rules and conditions of the respective funding programme.

Priority use of EURECA-PRO Flagship Funding

Activities and costs that are eligible for funding under the **EURECA-PRO Flagship Funding** programme (e.g. the organisation of workshops, networking events and other collaborative activities) should be financed through that programme in the first instance. As the Flagship Funding must be fully committed within its designated funding period, with all allocated funding to be spent by **31 October 2027**, applicants are expected to make use of this funding source before requesting support for the same activities under the UHasselt Energy in Transition Research Catalyst Programme. Consequently, such costs will only be considered under this call where they are not eligible for, or cannot be covered by, the EURECA-PRO Flagship Funding programme.
